This summer you can complete your Italian Graduate Language Proficiency online. During our eight-week summer course, you will review Italian grammar for the first part of the course and immerse yourself in translation and text interpretation in the second part. If you have never taken Italian before, do not worry: we will bring you up to speed!

Despite being online, this course will be interactive and student-centered, and your final project will focus on working with texts from your main research area. We will have online meetings Mondays and Wednesdays, 6:00-7:00 pm from May 7 to June 28.
